

Advanced Sealing Technology

Barnwell is at the forefront of sealing technology, with over 40 years experience in providing industry with sealing solutions, backed up by guaranteed product quality and availability, along with technical support and unrivalled knowledge of sealing products.

Sealmaker Service

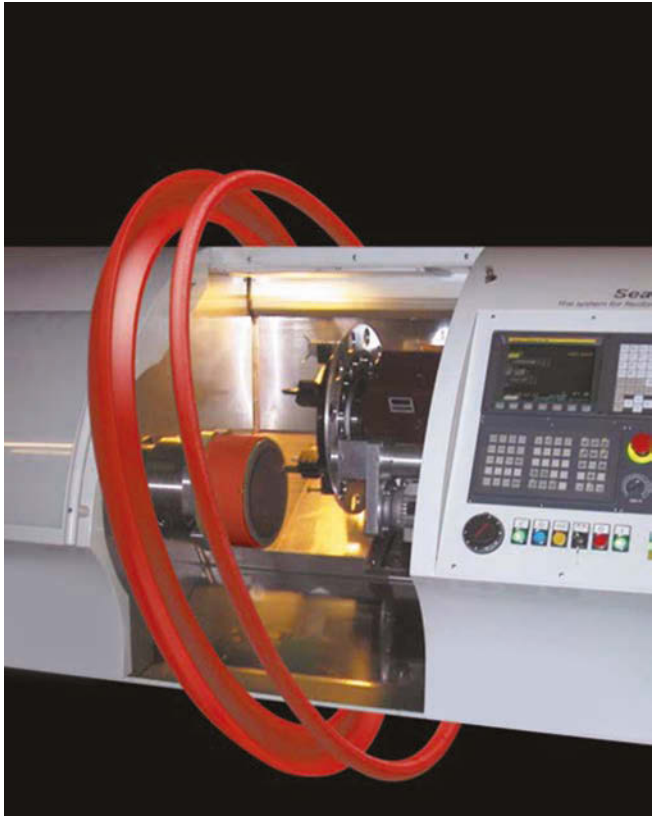

Our Seal Making Unit is manned by experienced, knowledgeable engineers and is geared up to manufacture urgent special or standard seals, in a variety of quality compounds, including Nitrile, Polyurethane, FPM, EPDM, Silicone and PTFE, which are held in stock. We can produce seals up to 520mm O.D. and larger sizes on request.

- No minimum quantity
- No minimum start up charge
- No tooling limitations
- Rapid response and delivery

Our production technology enables us to supply rapid, tailor-made sealing solutions for special applications.

Specials up to 1.5m outside diameter are available at short notice.

All profiles can additionally be modified to your special operating conditions.

First Impressions

Barnwell's special Image Branding and Packaging Service, "First Impressions", is available to all customers.

Our range of high speed label printing machines with the latest bar code software print information onto both standard and holographic labels. We also print directly onto polythene bags.

The kits can be branded in your own image and to your exact specifications. We can produce a design that includes your logo, part number and address details and packaging to suit your requirements.
